

AIRPARKOUR SET

As we continue to see a big shift within gymnastics clubs and schools towards freerunning, we have made a set specifically catering this market. Most of these products you already know.

We've taken the heavy hitters you already know such as the AirTrick, AirTrack, AirObstacle Parkour, and AirBox and gave them the equivalent of a leather jacket and sunglasses. They now feature a sleek carbon look designed to appeal to the freerunning demographic. It's the same quality, just much cooler.

Whether you are teaching a child their first landing or helping an elite athlete perfect a wall spin, the AirParkour Set provides the "boost" needed to train harder and longer.

PLAY VIDEO

Take your training to the next level with the AirWall Parkour. We've taken our classic AirFloor and revolutionized it for the urban athlete. Featuring heavy-duty D-rings and a reinforced bottom, this track is designed to take a beating.

Easily mount the AirWall to standard school wall bars to safely practice wall flips, wall runs, and spins.

Use it flat as a traditional tumbling track or combine it with the AirObstacle Parkour set for complex runs.

Perfect for gymnastics facilities looking to introduce Parkour without doubling their equipment budget. One track, two disciplines, endless possibilities.

Set 1: Parkour Basics	Weight: 38,5 kg
AirWall Parkour 400 x 200 x 10 cm	24 kg
